

BUSINESS PROCESS MANAGEMENT

From theory to practice, from methods to technologies (IBM tools for BPM)

Better processes produce lower cost, higher revenues, +motivated employees, and happier customers. Business Process Management (BPM) is an approach that's designed to produce better processes through the combination of technology and expertise. BPM is a collaborative effort between business units and the IT world, and this effort fosters a new paradigm of efficient and logical business processes. By using BPM, you not only improve your current processes, but also you build and deploy new capabilities and improve your Return on Investment (ROI).

Innovative Solutions & Technologies Center in Armenia and Enterprise Incubator Foundation kindly invite you to participate to the first ever organized hands-on training of Business Process Management.
